

▶ Our approach to education is based

- Children learn through exploration and experimentation with their environment as they move along the continuum of learning at their developmental level.
- Children are motivated to learn if they are able to process information from their perspective - touch, see, hear, smell, taste, and of course, play.
- Children's self-esteem grows when given responsibility and choices.
- Children feel secure in their learning when supported by a loving community of other children and families.

School Atmosphere

We encourage children to be....

**explorers,
creators,
communicators,
interactors,
questioners,
problem solvers,
thinkers,
reasoners,**

2&5

**Christian
Academy**

"Love the LORD your God
with all your heart and
with all your soul and
with all your strength"

-Deuteronomy 6:5-

Mission Statements

The 2&5 Friends Christian Nursery School in their commitment to sharing the news of God's love in Christ within the community provides a Nursery School Program. The Christian environment provided by our Nursery School is committed to fulfilling the goals of quality early childhood education. We enable children to demonstrate achievement in their intellectual, physical and creative development. Our programs will support learning, physical health, independence and problem solving through activities that include art, music, stories, fine and gross motor play both indoors and outside. We nurture the whole child to enable them to grow spiritually, socially, emotionally, and intellectually.

In the class with the teacher...
